

University of Wisconsin-Madison

An Analysis of K-Server algorithm performance

Stefan Caldararu, Marc Renault

Department of Computer Science, University of Wisconsin – Madison

May 3, 2023

Abstract

Write something here...

Keywords: add keywords...

Contents

1	Introduction	3
2	Background	3
3	Algorithm Description	4
3.1	Algorithm Derivation	4
4	Software implementation details and API	4
5	Numerical Experiments	4
6	Analysis	4
6.1	Analysis	4
7	Conclusion	4

1 Introduction

Write something here...

2 Background

Write background, what papers were read/literature analysis. What types of analysis are used?

3 Algorithm Description

3.1 Algorithm Derivation

Write about what algorithms were implemented, how the different algorithms work... etc.

4 Software implementation details and API

Write about the software implementation, threading, how the algorithms were implemented, etc.

5 Numerical Experiments

What experiments were conducted, and the results from the experiments...

6 Analysis

6.1 Analysis

Describe the results from the data that was collected, what is interesting, different results...

7 Conclusion

Write something here...
